

I am concerned about the possibility of LPFM stations interfering with current FM translator service. My family listens to national service K-Love radio on 91.3 in San Antonio. This station is an important part of our daily lives. It is a station that is positive, inspirational, and safe for my entire family. This type of station should be readily available to the general public for the above reasons. Displacement of this national station by LPFM stations would have a significant negative impact on my life and on my family. The public benefits to great measure from K-Love radio, and with all of the many problems and competing interests in the country today, we need this broadcast option. Thanks for your consideration.
